PROJECTS

SlackOff (Rails + React / Redux + PostgreSQL)
Single Page Chat Application inspired by Slack

- Employed bi-directional communication through Pusher Websocket protocol service.
- Enabled performant view layer by React framework's virtual DOM updates.
- Simplified the development workflow with Redux unidirectional data architecture.
- Implemented RESTful JSON API on Ruby on Rails backend for streamlined data flow.

Stellio (Node.js + Create.js)
Browser-based tile matching game inspired by Bejeweled

- Animated the game with Easel.js as a Canvas wrapper for graphical presentation.
- Leveraged Sound.js and Preload.js for seamless audio synchronization.
- Achieve something and something with some fancy thingy so wow so fast.
- Achieve something and something with some fancy thingy so wow so fast.

DOMinate (Node.js)
Lightweight Javascript library for DOM manipulation inspired by jQuery

- Abstracted browser API into Javascript objects utilizing wrapper design pattern.
- Streamlined the event handling and AJAX requests through intuitive syntax.
- Utilized linked-list data structure to traverse through the browser elements.
- Achieved faster library loading time through the selection of only essential functions.

EXPERIENCE
